

Connecting care receivers, caregivers, and providers in real time.

What is Seamless Care™?

Seamless Care™ is a next-generation, AI-powered health monitoring app designed to keep care receivers, caregivers, and providers seamlessly connected. It passively collects and summarizes health data from multiple sources, providing **real-time, 360° visibility**—with no daily input required.

Unlike other tools, **Seamless Care™** is **always on, secure, and easy to use**, making it ideal for long-term engagement.

Core Features

- **Real-Time Insights** – Seamless Care receives updates from Apple HealthKit, EMR's, Insurance Coverage, and 20+ Bluetooth devices.
- **AI-Driven Summaries** – Clear trends, alerts, and identification of care gaps.
- **Encrypted Sharing** – Secure exchange of health data between care receiver and caregiver.
- **Caregiver Mode** – Caregiver ability to seamlessly query status of care receivers' current status.
- **Doctor Mode** – A clinical decision-support tool during office visits.
- **Personal Assistant** – Natural language AI trained on individual health data

Who Benefits?

Caregivers

Immediate updates, clarity, and peace of mind 24/7.

Care Receivers

Personalized support and proactive health monitoring.

Healthcare Providers

Visibility into patient health data trends and possible issues.

Health Systems & Payers

Improved outcomes and reduced costs.

Seamless Care

Why it Matters

The U.S. is facing a **caregiving crisis**:

- Over **53 million Americans** identify as caregivers.
- Many belong to the “**Sandwich Generation**,” juggling care for aging parents and children.
- Most lack a **centralized tool** for easy to use, real-time health management awareness.

Seamless Care™ addresses this **urgent unmet need** by making caregiving simpler, safer, and smarter.

Why Choose Seamless Care™?

Always-On Monitoring

Passive and effortless.

Comprehensive View

Medical device, EMR, and insurance data all aggregated in one platform.

Built for Trust

Encrypted, secure, and private. No external servers involved.

Backed by Expertise

Developed by LifeScience Technologies, leaders in healthcare innovation.
